SITUATION SUMMARY

Potential Severe Weather – Southeastern California (No Change)

OVERVIEW

Strong and long-lived thunderstorms are expected over northwest Arizona and possibly southeast Nevada and far southeast California Tuesday. Unusually strong winds aloft colliding with deep moisture near the western Arizona border will lead to thunderstorms that may regenerate and train over some areas for at least a few hours at a time. This will increase the threat of flash flooding, particularly for Mohave County Arizona. Eastern parts of Clark and San Bernardino Counties could see similar storm behavior. Isolated severe thunderstorms with damaging winds and large hail will also be possible.

PRIMARY AREAS IMPACTED & TIMING

Eastern Clark (State of Nevada) and San Bernardino Counties:

Confidence LOW-MODERATE

Since the moisture boundary will be hovering near the Arizona border, thunderstorm coverage will be less extensive over Clark and eastern San Bernardino counties. However, if the moisture boundary shifts westward more than currently indicated, the Las Vegas Valley and Spring Mountains could see a better chance of thunderstorms.

IMPACTS

- Potential flash flooding, particularly around burn scars such as Dean Peak.
- Strong & erratic winds with some storm could be damaging and trigger blowing dust.
- Large hail will be possible with a few thunderstorms.

Potential Minor Coastal Flooding, Coastal Counties (New)

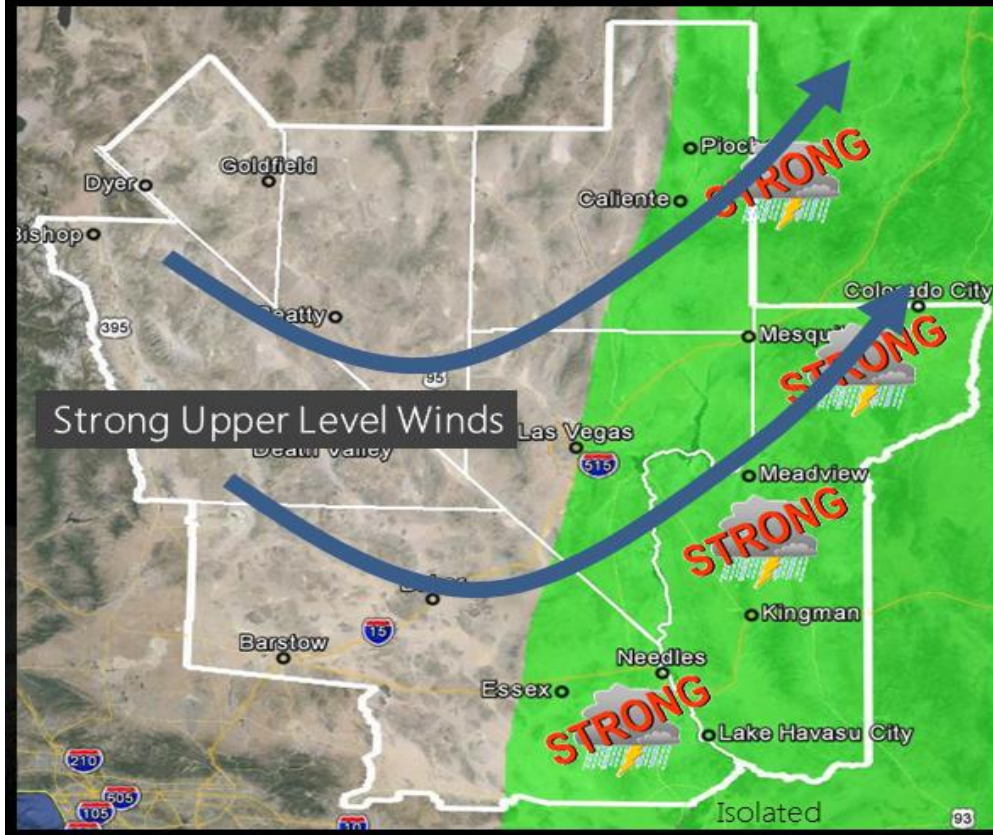

A large swell generated by Hurricane Marie will bring the threat of large surf, rip currents, and minor flooding to low lying areas of coastal Orange and northern coastal San Diego counties Tuesday, 08/26 through Thursday, 8/28.

SITUATION SUMMARY

Potential Severe Weather – Southeastern California (Continued)

Thunderstorm Outlook Tuesday

A low pressure moving into the Great Basin today into Tuesday will bring thunderstorms...some potentially strong to the the area highlighted in green. The best chances for strong storms will be over Mohave County.

Potential Impacts:

- Heavy rain
- Training Storms
- Flash Flooding
- Strong Gusty winds
- Small Hail
- Frequent Lightning
- Slick roads

SITUATION SUMMARY

Magnitude 6.0 Earthquake, American Canyon, Napa County

SITUATION UPDATE:

On Sunday, August 24, 2014, at 0320 Hours PST, a magnitude 6.0 earthquake struck five miles northwest of American Canyon, CA. The earthquake nucleated at a depth of 10.8km. The shaking intensity in American Canyon and Napa from the "South Napa Earthquake" was a "VII" on the Modified Mercalli Scale, suggesting very strong shaking occurred in the Napa County area. Ground shaking was felt as far south as Salinas, east to Sacramento, and north to Ukiah. USGS estimates that aftershocks should be expected for the next week.

Aftershocks

- As of August 26, 2014 at 0924 Hours PST there have been 87 aftershocks, four of which are M3.0 or greater (Source: USGS).
- In the next 7 days the aftershock forecast, based on the USGS earthquake sequence has a likelihood of Magnitude 5 and larger is approximately 14%. There is a 5-10% chance of an earthquake equal to or larger than the current mainshock. In addition, approximately 2-12 small aftershocks are expected in the same 7 day period and may be felt locally.
- The Cal OES Earthquake and Tsunami Duty Officer is in contact with the United States Geological Survey and California Geological Survey and will provide updates as new information becomes available.

Area Weather Forecast

Quiet weather is expected across the San Francisco and Monterey Bay Region all work week.

- Currently have a slight chance of rain for the weekend.
- Highs will be in the 60's and 70's at the coast with 80's to mid-90's inland for most cities.
- Friday and Saturday temperatures in the lower 100's are possible for far southern and interior regions.

Access and Functional Needs

- Accessibility for the Points of Distribution (POD) of water and food, including considerations for bus routes, parking, entrances, and restrooms (if open to the public) is a concern. A plan for those that cannot get to the POD and an accessible plan for communicating how to request assistance may be needed.
- The City of Napa has updated their website to include advisories and information regarding water supplies and usage (90 water line leaks/breaks, 8 water lines repaired), PG&E will continue courtesy checks for residents, (89 residents without service). Cal OES OAFN has requested that messaging to include phone number of OAFN if assistance is needed.

Tribal Affairs

- Per the Cal OES Tribal Liaison, no damages have been reported for: Cloverdale Rancheria in Cloverdale, Stewarts Point Rancheria in Santa Rosa, and Lytton Rancheria in Santa Rosa.
- Building inspections are being completed at Graton Rancheria in Rohnert Park. Information to follow.
- The Tribal Office is still trying to make contact with Dry Creek Rancheria in Geyerville and Middletown Rancheria.

ACTIVE WEATHER WARNINGS, WATCHES and ADVISORIES:

- http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER

WEATHER SYNOPSIS BY REGION:

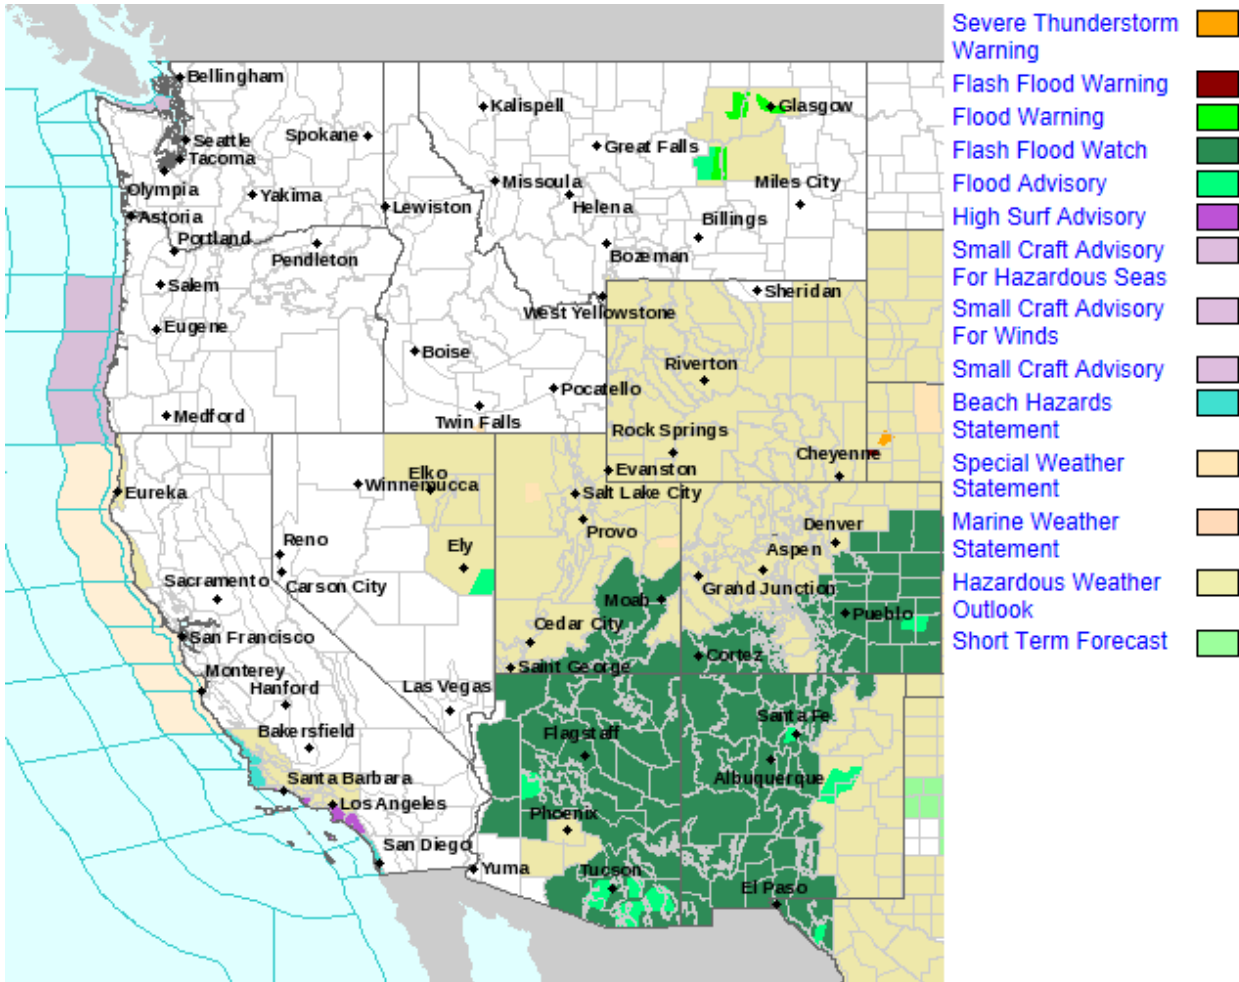

NORTHERN CALIFORNIA:

Higher pressure will be moving over the region for the next few days. The warmest days this week are likely to be today through Thursday with around 100 degrees in the warmest inland areas. Stable conditions under the high are likely to aggravate the poor air quality conditions near the ongoing Klamath National Forest fires. A trough will drop south from the Gulf of Alaska late this week and over the weekend. Cooler temperatures, areas of better overnight relative humidity recovery and some high cloudiness are expected from this weather pattern change. There will be a slight chance of some light showers with the trough Friday through the weekend, but the system appears most likely to be dry. Hurricane Marie will move into place well off the Central California coast by the weekend, but the Pacific High will keep its moisture from moving into the region. Light north to east or southeast winds will be in place for the next few days with sustained wind speeds mostly less than 10 mph. Somewhat stronger winds will return Thursday through Saturday with speeds and directions more typical of local diurnal patterns. Wind directions will be more south to westerly in the afternoons again then. Mostly northerly winds appear likely to develop Sunday through early next week and locally may reach moderately strong speeds. The marine layer near the coast will persist and continue at about the same depths or a bit deeper.

SOUTHERN CALIFORNIA:

The weak trough which has brought relatively cool weather to much of the area will depart the region, allowing high pressure to build over the state during the second half of the week. This will result in drier and warmer weather Wednesday through Friday. Yesterday, onshore flow produced wind gusts to around 45 mph in the Antelope Valley and Banning Pass, but wind speeds should only reach the 15-25 mph in these areas this afternoon. As high pressure strengthens across the state, expect weaker onshore flow and light winds the rest of the week. By Thursday and Friday, the interior valleys and lower foothills below 2,000 feet to approach 100 degrees with readings in the upper 70s to mid 80s in the mountains below 7,000 feet. Minimum relative humidity may reach 10-15% for 3-5 hours each afternoon in the mid slope regions. Remnant moisture from Hurricane Marie may result in an increase in high clouds which may take the edge off afternoon temperatures Friday. This weekend, another trough over the Great Basin is expected to produce cooler temperatures and stronger onshore flow. Wind gusts to 45 mph may be possible in and near the deserts during the afternoon hours this weekend. No thunderstorms are expected during the period.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- Current Reservoir Levels continue to decline. Levels as of August 21st : Don Pedro 41%; Exchequer 17%; Folsom Lake 40%; Lake Oroville 32%; Millerton Lake 46%; New Melones 24%; Pine Flat 11%; San Luis 19%; Lake Shasta 31%; Trinity Lake 30%; Pyramid Lake 94%; and Castaic Lake 44%.

- Emergency Drinking Water Procurement and Distribution Planning Guidance (rev. May 2014)

Significant changes have occurred to the structure of California's state government organization. Rapid advances in systems, science, and technology have helped emergency managers improve coordination, forecasting, and situational awareness. Because of these changes, the *Multi-Agency Emergency Response Procedures for Potable Water Procurement & Distribution* document has been replaced by the *Emergency Drinking Water Procurement and Distribution Planning Guidance*. The intent of this guidance document is to clarify the roles and responsibilities of the stakeholders involved in locating, procuring, and delivery of emergency drinking water to populations in California. Consequently creating a framework for agencies and organizations to work together to enhance preparedness.

- State Board Mandatory Conservation Regulations Now in Effect: The state's first-ever emergency regulations mandating urban water conservation became effective will be in effect until April 25, 2015.

http://www.waterboards.ca.gov/waterrights/water_issues/programs/drought/emergency_regulations_waterconservation.shtml

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.

- Cal OES continues to gather drought-related costs from state agencies and local governments.

CAL OES MISSIONS

New Cal OES Missions

- **2014-LAW-5397** 08/26/2014 at 1713 hours International Emergency Response Coordination Center advised that a SPOT device is sounding in Tuolumne County. Cal OES LDO is coordinating resources.
- **2014-LAW-5354** On 8/26/14 at 0307 hours, Tuolumne County Sheriff's Office (TCSO) is requesting SAR resources to help locate a missing 63 year old female in the Columbia area off Saw Mill Flat Rd. The MP was last seen on video walking out of her home approximately 1100 hrs. on Monday, August 26, 2014. The family, which didn't see the video until approximately 1900 hrs., that day, immediately notified authorities, who initiated search efforts. The MP has medical issues and may be confused due to medications taken for arthritis and fibromyalgia. TCSO is requesting one trailing and one tracking K-9, along with helicopter support from CHP H-40 out of Fresno. The search area is a mixed rural/urban open space, containing heavy brush, and is at 1500'-2000' elevation. Tuolumne has already contacted both Calaveras County for the K-9 support and CHP for the helicopter. **Mission Ongoing.**

CAL OES EXERCISES

Oroville Dam Emergency Action Plan Exercise, Butte County (No Change)

- August 27th, Oroville Dam Emergency Action Plan Exercise – Cal OES Inland Region Staff and Cal OES T-Comm Staff will participate in this functional exercise.
- An MRT has been created to provide a MIGU for communications during the Exercise.
- The Warning Center and Region may receive notifications as a result of this Exercise on August 27th.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
